Inserting Documents

1. **Inserting a single document.**

   a. A single document can be inserted in a collection using **insertOne()** function.

      i. **Syntax**

         db.<collection>.insertOne(<document>)

      ii. **Example**

         db.user.insertOne({emp_id: 2, name: "Bob"})

   b. A single document in a collection can also be inserted using the **insert()** function.

      i. **Syntax**

         db.<collection>.insert(<document>)

      ii. **Example**

         db.user.insert({emp_id: 2, name: "Bob"})

2. **Inserting multiple documents.**

   a. Multiple documents can be inserted in a collection using **insertMany()** function.

      i. **Syntax**

         db.<collection>.insertMany([<document>, <document>, ...)

      ii. **Example**

         db.user.insertMany([{emp_id:3, name:"Raj"}, {emp_id:4, name:"Irfan"}])

   b. Multiple documents can also be inserted in a collection using **insert()** function.

      i. **Syntax**

         db.<collection>.insert([<document>, <document>, ...)

      ii. **Example**

         db.user.insert([{emp_id:3, name:"Raj"}, {emp_id:4, name:"Irfan"}])
